SEMESTER - I

MJR 101: FINANCIAL ACCOUNTING - I

PAPER CODE: MJR101 **Max. Marks: 80U +20I=100**
THPW: 5; Credits: 5 **ESED: 3 hrs**

Course Objectives:

1) To understand the accounting process.
2) To classify and record various business transactions in the respective subsidiary books.
3) To know the reasons for disagreement of cash book and bank pass book balances.
4) To identify and rectify the accounting errors at various stages of accounting cycle.
5) To prepare the final accounts of the sole trader.

Course Outcomes:

1) Describe and understand the accounting principles and recording of business transactions in Journal.
2) Prepare ledgers and subsidiary books.
3) Prepare and analyze the bank reconciliation statement.
4) Understand the way of rectification of errors in the books of accounts.
5) Understand the needs of preparing financial statements with adjustments.

UNIT-I: ACCOUNTING PROCESS:

Financial Accounting: Introduction – Definition – Evolution – Functions - Advantages and Limitations – Users of Accounting Information - Branches of Accounting – Accounting Principles: Concepts and Conventions - Accounting Standards – Meaning – Importance – List of Accounting Standards issued by ASB - Accounting System - Types of Accounts – Accounting Cycle – Journal - Ledger and Trial Balance (Including Problems)

UNIT-II: SUBSIDIARY BOOKS AND RECTIFICATION OF ERRORS:

Meaning – Types: Purchases Book - Purchases Returns Book - Sales Book - Sales Returns Book - Bills Receivable Book - Bills Payable Book – Cash Book: Single Column, Two Column, Three Column and Petty Cash Book - Journal Proper (Including Problems)

Rectification of Errors: Types of Errors - Suspense Account – Effect of Errors on Profit (Including Problems)

UNIT-III: BANK RECONCILIATION STATEMENT:

Meaning - Need - Reasons for differences between C ash Book and P ass Book balances –Favorable and Overdraft balances – Ascertainment of correct Cash Book balance (Amended Cash Book) - Preparation of Bank Reconciliation Statement (Including Problems)

UNIT-IV: DEPRECIATION ACCOUNTING:

Depreciation (Ind-AS-16): Meaning – Causes – Difference between Depreciation, Amortization and Depletion - Objectives of providing for depreciation – Factors affecting depreciation –Accounting Treatment – Methods of Depreciation: Straight Line Method - Diminishing Balance Method and Sum of the Units Method (Including Problems)

UNIT-V: FINAL ACCOUNTS OF SOLE TRADER:

Capital and Revenue Expenditure – Capital and Revenue Receipts: Meaning and Differences -Deferred Revenue Expenditure.

Final Accounts of Sole Trader: Meaning - Uses - Preparation of Manufacturing, Trading and Profit & Loss Account and Balance Sheet – Adjustments – Closing Entries (Including problems)

MJR103 : FUNDAMENTALS OF INFORMATION TECHNOLOGY

Paper Code: MJR 103 **Max Marks: 50T+35P+ 15I =100**

THPW :5(3T+4P), Credits : 5 **ESED : 3 Hours**

Objective: To understand the basic concepts and terminology of information technology and to identify issues related to information security.

Course Objectives:

1. To introduce students to the basic structure, functions, and types of computers.
2. To develop understanding of number systems, computer arithmetic, and data storage fundamentals.
3. To provide foundational knowledge of system and application software.
4. To explain the role and functions of operating systems and system utilities.
5. To impart knowledge on data communication, networking concepts, and related hardware.

Course Outcomes:

1. Identify and describe components and functions of a computer system.
2. Perform conversions and arithmetic operations in various number systems.
3. Distinguish between system software and application software with examples.
4. Understand operating system functions and classify processing techniques.
5. Explain data communication concepts and recognize basic networking devices and topologies.

UNIT I: FOUNDATIONS OF COMPUTING & DIGITAL BUSINESS:

Components of a Computer System: Hardware (CPU, RAM/ROM), **Input/output Devices:** Traditional (Mouse, Keyboard, Printer) and Modern (Biometric Scanners, IoT Sensors, Touch Devices) - **Software** - System Software & Application Software, Bits, Bytes & Data Representation, **Types of Storage:** RAM, ROM, SSD, HDD, Flash Drives - **Cloud vs. Local Storage:** Applications in Business - **File Systems & Organization:** Files, folders, extensions - **Operating Systems:** Functions, types (Windows, Linux, MacOS, Android, iOS) - **Utility Software:** Antivirus, Backup, File compression, System optimization tools- **Introduction to Digital Transformation in Business** - Strategic Role of IT in Functional Areas (Finance, Marketing, HR, SCM) - **Emerging Business Applications**: ERP,CRM-SCM-HR, Meaning, Benefits - Applications in Business.

UNIT II: NUMBER SYSTEM, NETWORKING AND INTERNET IN BUSINESS:

Encoding Schemes and Number System: Introduction – Number System – Conversion between Number Systems - **Binary Logic:** Binary system, AND, OR, NOT (basic illustrations) - **Basics of Networking:** LAN, WAN, WLAN - Network Topologies (Star, Bus, Ring, Mesh - conceptual) - **Devices:** Routers, Switches, Modems (roles and applications) - Client-Server Architecture - **Internet Fundamentals: :** Internet, Uses of Internet, Types of Internet Connection, (Dial-up Connection, Broadband Connection, Wi-Fi, Mobile Internet, Bluetooth, HotSpots), Browsers, URL, IP Address, Webpage and Websites - Basic Internet Navigation and Search Techniques - Bandwidth & Speed Concepts (bps, Mbps, Gbps) - **E-Commerce Basics:** Models and relevance - Social Media in Business.

UNIT III: OFFICE AUTOMATION AND APPLICATIONS FOR BUSINESS:

Definition & Importance of Office Automation - Benefits of Office Automation in Business - Overview of Office Automation Tools (MS Office) - Office Automation vs. Traditional Office Work

Office Productivity : **Microsoft Word & Google Docs** - Creating, Editing, and Formatting Documents - Working with Tables, Charts, and SmartArt - Mail Merge: Automating Letters, Invoices, and Reports - Creating Business Reports, Resumes, and Legal Documents - **Presentation Software (MS PowerPoint & Google Slides)** - Creating Professional Business Presentations - Slide Layouts,

Transitions, and Animations - Using SmartArt and Charts for Business Data Representation - Custom Templates for Corporate Reports and Proposals.

UNIT IV: SPREADSHEET APPLICATIONS (MS-EXCEL, GOOGLE SHEETS):

Basics of Excel: Data Entry, Formatting, and Cell References - Formulas & Functions (SUM, AVERAGE, IF, VLOOKUP, HLOOKUP) – data Charts and Graphs for Business Analysis, validation - Pivot Tables - Automation - Financial Functions (NPV, IRR, PMT) for Accounting.

UNIT V: EMERGING TECHNOLOGIES, ETHICAL & SOCIAL ASPECTS

Cloud Computing: Concepts, characteristics, advantages - **Service Models:** SaaS, PaaS, IaaS - **Deployment Models:** Public, Private, Hybrid - **Cyber security Essentials: Types of threats:** Malware, Phishing, DoS attacks - **Protective Measures:** Strong passwords, MFA, antivirus, firewalls - Data Backup and Recovery - Safe Browsing Practices - Introduction to Cyber Laws & Data Privacy Regulations (GDPR & India's DPDPA)

Emerging Technologies: AI & ML, Internet of Things (IoT), Block Chain Technology, Big Data, RPA – Definition, Examples, Benefits and Applications.

Ethical & Social Aspects: Digital divide, Digital FootPrints, Digital Society and Netizen, Data Protection, IT Act, Impact on Health, Intellectual property.

Practical Component (2 Hours per Week)

Hands-on sessions aligned with each unit:

- OS Navigation & File Handling
- Microsoft Office / Google Workspace:
  - Advanced Word, Excel, and PowerPoint features
  - Mail merge, Data sorting, Pivot Tables, Charts
- Internet Browsing & Research Skills
- Cloud Tools: Google Drive, One Drive collaboration

SUGGESTED READINGS:

1. Fundamentals of Information Technology: Puneet Kumar & S. Bhardwaj, Kalyani Publishers.
2. Fundamentals of Information Technology: Kavitha Reddy, Dr.G.Srinivas & Others S Publishers.
3. Computer Fundamentals: P.K.Sinha
4. Fundamentals of Informantion Technology :Dr.Jayalaxmi and others : Professional Books Publisher
5. Fundamentals of Information Technology: Mrs. R. Renuka: Vedashree Publishers
6. Fundamentals of Information Technology: Tulasi Ram Kandula: Himalaya Publishing House
7. Fundamentals of Computers: C S V Murthy: Himalaya Publishing House
8. Computer Science Reference Text Books of XI & XII of NCERT 2025-2026 Edition.

SEMESTER - II

Paper MJR 201: FINANCIAL ACCOUNTING-II

PAPER CODE: MJR 201 **Max. Marks: 80U +20I=100**
THPW: 5; Credits: 5 **ESED: 3 hrs**

Objective: *To acquire Accounting knowledge of bills of exchange and other business accounting methods.*
Course Objectives:
1. Understand accounting treatment for bills of exchange, consignment accounts, and joint ventures
2. Develop skills in accounting for incomplete records and single entry system
3. Familiarize with accounting for non-profit organizations
4. Apply accounting principles and standards to various business transactions
5. Analyze and interpret financial statements for different types of organizations

Course Outcomes:
1. Prepare accounting records for bills of exchange, consignment accounts, and joint ventures
2. Convert incomplete records to double-entry system and prepare financial statements
3. Prepare financial statements for non-profit organizations, including receipts and payments account, income and expenditure account, and balance sheet
4. Apply accounting standards and principles to various business transactions and events
5. Analyze and interpret financial statements for informed decision-making

UNIT-I: BILLS OF EXCHANGE:

Bills of Exchange – Definition - Distinction between Promissory note and Bills of exchange - Accounting treatment of Trade bills: Books of Drawer and Acceptor- Honour and Dishonour of Bills - Renewal of bills - Retiring of bills under rebate – Endorsement of bills - Accommodation bills (Including problems)

UNIT-II: CONSIGNMENT ACCOUNTS:

Consignment - Meaning – Features - Proforma invoice - Account sales - Del credere commission-Accounting treatment in the books of the consignor and the consignee - Valuation of consignment stock (Focusing on proportionate non-recurring expenses) - Treatment of Normal and abnormal Loss - Invoice of goods at a price higher than the cost price (Including problems)

UNIT-III: JOINT VENTURE ACCOUNTS:

Joint Venture - Meaning – Features - Difference between Joint Venture and Consignment - Accounting Procedure - Methods of Keeping Records for Joint Venture Accounts - Method of Recording in co-ventures books (When separate books are not maintained) - Separate Set of Books Method - Joint Bank Account – Brief overview of Memorandum Joint Venture Account (Including problems)

UNIT-IV: ACCOUNTS FROM INCOMPLETE RECORDS:

Single Entry System - Meaning – Features - Difference between Single Entry and Double Entry systems - Defects in Single Entry System - Books and accounts maintained - Ascertainment of Profit - Statement of Affairs Method - Conversion method (Preparing complete trading, Profit and Loss Account and Balance Sheet (Including problems)

UNIT-V: ACCOUNTING FOR NON-PROFIT ORGANIZATIONS:

Non- Profit Organization - Meaning - Features - Receipts and Payments Account - Income and Expenditure Account - Balance Sheet Treatment of special items like Entrance Fees, Donations, Legacy, etc. – Calculation of consumption of consumables (E.g., Stationary, Medicines) and Stock adjustments (Including problems)

SUGGESTED READINGS:

1. Accountancy-I: Haneef and Mukherjee, Tata McGraw Hill Co.
2. Principles and Practice of Accounting: R.L. Gupta & V.K. Gupta,Sultan Chand & Sons.
3. Accountancy–I: Tulasian, Tata McGraw Hill Co.
4. Prof. Prashanta Athma: Financial Accounting -1: Himalaya Publishing HousePvt Ltd.
5. Prof. K. Krishna Chaitanya: Financial Accounting -II: Kalyani Publishers-2025.
6. Financial Accounting- II: S.P. Jain & K.L Narang, Kalyani publishers. 2nd Revised Edition-2017
7. Advanced Accountancy-I: S.N.Maheshwari&V.L.Maheswari, Vikas.
8. Advanced Accountancy: M Shrinivas& K Sreelatha Reddy, Himalaya Publishers.
9. Financial Accounting: M.N Arora, Tax Mann Publications.
10. Dr. K. Naveen Kumar: Financial Accounting -1: Vedashree Publishers-2024
11. Financial Accounting –II: Prof. Kamatam. Srinivas, S. Publications-2025.
12. Financial Accounting-II: Mrs. K.Archana, P.Subhashini, SV Publication.First Edition-2025
13. Financial Accounting-II: Dr Yogeshwaran, E.V. Chandramohan Sastry, Professional books Publishers. New edition-2025, Year of Publication-2018
14. Financial Accounting-II: Prof Prabhu Sahai, Mary Vinaya Sheela and Others, DL Publishers and Distributors-2025.
15. Financial Accounting-II: Dr K Naveen Kumar and Dr D SreeRam Vedashree Publishers-2025.
16. Financial Accounting-II: Kamala Devi, Rachana Sharma and Others, Vedashree Publishers-2025.

SEMESTER - II

Paper MJR 202: BUSINESS LAWS

PAPER CODE: MJR 202 **Max. Marks: 80U +20I=100**
THPW: 5; Credits: 5 **ESED: 3 hrs**

Objective: *To understand basics of contract act, sales of goods act, IPRs and legal provisions applicable for establishment, management and winding up of companies in India.*

Course Objectives:

1. Understand the fundamentals principals and application of Indian Contract Act, 1872.
2. Analyze the Key provisions of the Sale Goods Act, 1930 and the Consumer Protection Act, 2019
3. Learn about the Intellectual Property Rights, (IPRs) Protection.
4. Understand Legal aspects of Company Management and Governance under the Companies Act, 2013.
5. Study the modern process of corporate insolvency and liquidation under the insolvency and bankruptcy Code (IBC), 2016

Course Outcomes:

1. Analyze and apply contract law principles to business transactions
2. Understand consumer rights and protection under the Consumer Protection Act
3. Identify and protect intellectual property rights, including trademarks, patents, and copyrights
4. Apply company law principles to manage companies and conduct meetings
5. Understand the process of winding up and insolvency laws, including the Insolvency and Bankruptcy Code

UNIT–I: INDIAN CONTRACT ACT, 1872:

Agreement and Contract : Defination - Essentials of a valid contract - Types of contracts (Valid Void Voidable, Unenforceable, Quasi-Contracts) – Formation of Contract: Offer and Acceptance - Essentials of valid offer and acceptance - Communication and revocation – Capacity and Concent: Competency to contract Free Concent (Coercion, Undue influence, Fraude, Misrepresentation, Mistake) – Consideration and Legality: Definition - Essentials of valid consideration (Nudum pactum), Agreements Declared Voide (Restraint of Trade, Legal Proceedings) – Dischange and Breach: Modes of Discharge of a contract – Breach of Contract (Actual and Anticipatory)- Remedies for Breach (Damages, Specific Performance, Injunction, Rescission - Special Contracts (Indtrduction) – Overview of Contract Indemnity and Contract Gurantee.

UNIT–II: SALE OF GOODS ACT, 1930 AND CONSUMER PROTECTION ACT, 2019:

The Sale of Goods Act, 1930: Contract of Sale - Essentials of Valid Sale - Sale and Agreement to Sell – Definition and Types of Goods. Stipulations: Conditions and Warranties (Implied and Express) - Caveat Emptor and its Exceptions. Transfer of Title: Rules regarding Trancefer of Property – Rights of Unpaid Seller: Defination of an Unpaid Seller - Rights of Unpaid Seller – Against the Goods and Against the Buyer personally. Consumer Protection Act, 2019 (Latest Act) Core Concepts: Definition of Consumer (Includes E-Commerce) - Goods - Service - Consumer Dispute – Unfaire Trade Practices – Misleading Advertisement and Product Liability. Institutional Framework: Introduction to the Central Consumer Protection Authorioty (CCPA). Redressal Agencies: Consumer Dispute Redressal Commissions (District, State, National) - Compositions and Latest Monitory Jurisdiction Limits, E-Commerce and Digital Age: Key Provision of the Consumer Protection (E-Commerce) Rules, 2020 (e.g., Liability of Market Place vs. Inventory Model.

UNIT–III: INTELLECTUAL PROPERTY RIGHTS (IPRS):

Trade Marks: Definition – Funtions – Procedure for Registration, Duration and Renewal, Infringement and Passing off - Patents: Definition - Kinds of Patents –patatentable and non patentable Inventions - Rights of the Patentee - Transfer of the Patent Rights, Infringement - Copy Rights: Definition - Rights of the Copyright Owner - Terms of Copy Right - Infringement and Faire Use - Other Intellectual Property Rights: Introduction to Design Act, 2000 - Trade Secrets and Geographical Indications (GI).

SUGGESTED READINGS:

1) Company Law: ND Kapoor, Sultan Chand and Co.
2) Company Law: Rajashree. – HPH
3) Business Law - Kavitha Krishna, Himalaya Publishing House
4) Business Laws – Dr. B. K. Hussain, Nagalakshmi – PBP
5) Business Law: V K Sareen, Kalyani Publishers. 1st Edition-2020
6) Company Law: Prof. G. Krishna Murthy, G. Kavitha, PBP
7) Company Law and Practice: GK Kapoor& Sanjay Dhamija, Taxmann Publication.
8) Business Law – Dr. Indrakanti Sekhar & Ms. Tulja Bhavani, SIA Publishing & Distributors Pvt. Ltd.
9) Company Law: Revised as per Companies Act- 2013: KC Garg et al, Kalyani Publication.
10) Corporate Law: PPS Gogna, S Chand.
11) Business Law: D.S. Vital, S Chand
12) Company Law: Bagrial AK, Vikas Publishing House.
13) Business Law: B.K. Hussain, S. Gopal Rao, Professional books Publishers, Edition-2024, Year of Publication – 2020.
14) Business Laws: Madhavi AVR, D. Bhaskara Lakshmi, SV Publication. First Edition- 2025
15)Business Laws: S.P. Neehalika Bavya: S. Publishers.
16)Business Laws: Dr D Saritha and Prof Prabhu Sahai, DL Publishers and Distributors-2025.
17)Business Laws: Revathi Devi Mathur, Vedashree Publishers-2025.

SEMESTER - II

Paper MJR 203: PROGRAMMING WITH C & C++

PAPER CODE: MJR 203: **Total Marks:50T+35P+15I=100**
THPW: 5 (3T+4P) ; Credits: 5 **ESED: 2 HRS**

Objective: To understand the fundamental concepts of programming in C and Object Oriented Programming using C++.

Course Objectives:

1. Learn the basics of C programming language
2. Understand control statements, loops, functions, arrays, and strings in C
3. Familiarize with pointers, structures, and unions in C
4. Learn object-oriented programming concepts using C++
5. Develop problem-solving skills using C and C++ programming languages

Course Outcomes:

1. Write C programs using variables, data types, operators, control statements, loops, functions, arrays, and strings
2. Use pointers, structures, and unions to solve complex problems in C
3. Develop C++ programs using object-oriented programming concepts, including classes, objects, inheritance, polymorphism, encapsulation, and abstraction
4. Apply problem-solving skills to real-world problems using C and C++ programming languages
5. Analyze and debug C and C++ programs to ensure correctness and efficiency

UNIT-I: INTRODUCTION TO C LANGUAGE, VARIABLES, DATA TYPES AND OPERATORS:

Introduction: Types of Languages- History of C language – Basic Structure –Programming Rules – Flow charts-algorithms–Commonly used library functions - Executing the C Program - Pre-processors in "C"- Keywords & Identifiers – Constants – **Variables:** Rules for defining variables - Scope and Life of a Variable – **Data types** - Type Conversion - Formatted Input and Output operations. **Operators:** Introduction – Arithmetic – Relational – Logical – Assignment - Conditional - Special - Bitwise - Increment / Decrement operator.

UNIT-II: WORKING WITH CONTROL STATEMENTS, LOOPS:

Conditional statements: Introduction - If statements - If-else statements – nested if-else – break statement-continue statement-go to statement-Switch statements. **Looping statements:** Introduction-While statements – Do-while statements - For Statements-nested loop statements.

UNIT-III: FUNCTIONS, ARRAYS AND STRINGS:

Functions: Definition and declaration of functions- Function proto type-return statement- types of functions-formatted and unformatted functions. **Built in functions:** Mathematical functions – String functions – Character functions – Date functions. **User defined functions:** Introduction – Need for user defined functions – Elements of functions – Function call – call by value and call by reference – Recursive functions. **Arrays:** Introduction – Defining an array – Initializing an array –characteristics of an array- One dimensional array – Two dimensional array – Multi dimensional array. **Strings:** Introduction – Declaring and initializing string – Reading and Writing strings – String standard functions.

UNIT-IV: POINTERS, STRUCTURES AND UNIONS:

Pointers: Features of pointers- Declaration of Pointers-arithmetic operations with pointers

Structures: Features of Structures - Declaring and initialization of Structures –Structure within Structure-Array of Structures- Enumerated data type-**Unions**- Definition and advantages of Unions comparison between Structure & Unions.

UNIT-V: OBJECT ORIENTED CONCEPTS USING C++:

Object Oriented Programming: Introduction to Object Oriented Programming - Structure of C++ – Simple program of C++– Storage Classes- Similarities and Differences between C & C++ - Data Members-Member Functions - Object Oriented Concepts- Class-Object-Inheritance-Polymorphism-Encapsulation-Abstraction.

SUGGESTED READINGS:

1. Programming with C& C++ : Indrakanti Sekhar, V.V.R.Raman & V.N.Battu, Himalaya Publishers.
2. Programming with C& C++: Dr. G. Srinivas, G. Kavitha Reddy & Mubeena Shaheen: S Publishers.
3. Programming with C& C++: M. Shalini, Kalyani Publishers. 1 Edition, Year of Publication -2020.
4. Mastering C: K.R. Venugopal, McGraw Hill.
5. C: The Complete Reference: H.Schildt, McGraw Hill.
6. Let Us C: Y.Kanetkar, BPB.
7. Objected Oriented Programming with C++: E. Balagurusamy, McGraw Hill.
8. Mastering C++: KR.Venugopal & R.Buyya, McGraw Hill.
9. Schaum‟s Outlines: Programming with C++: by John R Hubbard.
10. Let Us C++: Y.Kanetkar, BPB.
11. Programming in ANSI C: Balagurusamy, McGraw Hill.
12. Programming with C& C++: Mrs. A Madhavi, K. Maheshwari, S.V. Publications. First Edition – 2025.
13. Programming with C++: KVR Saraswathi, S. Jayalakshmi & M. Sudha, Professional Books Publishers. Edition – 2025, Year of Publication – 2020.
14. Programming with C& C++: Dr N Uday Bhaskar and Dr Sambasiva Rao Bargada, DL Publishers and Distributors, 2025.
15. Programming with C& C++: R Renuka, Veda Shree Publishers 2025.

SEMESTER - III

Paper MJR 301: ADVANCED ACCOUNTING

PAPER CODE: MJR 301 **Max. Marks: 80U +20I=100**
THPW: 5; Credits: 5 **ESED: 3 hrs**

Course Objectives:

1. Understand partnership accounting for operational changes and ownership transitions
2. Apply accounting procedures for dissolution, insolvency, and corporate conversion of firms
3. Analyze corporate equity and debt structure including shares and debentures
4. Prepare company final accounts as per statutory requirements
5. Apply valuation techniques for goodwill and shares

Course Outcomes:

1. Record partnership transactions including admission, retirement, death, and adjustments of capital
2. Prepare accounts for dissolution of firms, including insolvency and piecemeal distribution using Garner vs. Murray rule
3. Account for issue, forfeiture, and re-issue of shares and debentures per Companies Act, 2013
4. Prepare Company Final Accounts with Schedule III compliance and allocate profits prior to incorporation
5. Compute goodwill and share values using Average Profits, Super Profits, Capitalization, Net Assets, and Yield methods

UNIT - I: PARTNERSHIP ACCOUNTS - I (OPERATIONAL & OWNERSHIP TRANSITIONS):

Foundations of Partnership: Meaning, Legal Framework of the Indian Partnership Act, 1932; Essential clauses and significance of a Partnership Deed; Maintenance of Capital Accounts — Fixed Capital Method vs. Fluctuating Capital Method; Accounting for Interest on Capital, Interest on Drawings, Salaries, and Commission to partners.

Admission of a Partner: Calculation of New Profit Sharing Ratio and Sacrificing Ratio; Treatment of Goodwill (Premium Method, Revaluation Method, and Memorandum Revaluation Method); Valuation and accounting treatment of accumulated profits, unrecorded assets, reserves, and revaluation of assets and liabilities; Adjustment of Partner Capitals based on new ratios.

Retirement and Death of a Partner: Calculation of New Profit Sharing Ratio and Gaining Ratio; Revaluation of assets/liabilities and treatment of goodwill upon retirement; Accounting treatment for the transfer of a retiring partner's balance to a Loan Account; Accounting for the Death of a Partner: Computation of a deceased partner's share of profit up to the date of dissolution (Excluding Joint Life Policy calculations) *(Theory and Numericals)*.

UNIT - II: PARTNERSHIP ACCOUNTS - II (DISSOLUTION, INSOLVENCY & CORPORATE CONVERSION):

Dissolution of Partnership Firms: Meaning and Legal distinction between the dissolution of a partnership and the dissolution of a firm; Statutory provisions for the settlement of accounts upon dissolution (Section 48 of the Indian Partnership Act); Preparation of Realisation Account, Partner's Loan Account, Partner's Capital Accounts, and Cash/Bank Account.

Insolvency of Partners: Advanced application of the **Garner vs. Murray rule** (Distribution of capital deficiency caused by insolvency among solvent partners); Accounting treatment excluding the case of insolvency of all partners simultaneously.

Piecemeal Distribution & Corporate Sale: Piecemeal distribution of cash assets to partners during gradual liquidation (Maximum Loss Method and Surplus Capital Method); Conversion and sale of an ongoing partnership firm to a Limited Joint Stock Company — Computation of Purchase Consideration and final closing books of accounts of the firm *(Theory and Numericals)*.

UNIT - III: CORPORATE EQUITY, DEBT ARCHITECTURE & SHARE CAPITAL LOGISTICS

Issue of Shares: Overview of the Share Capital structure of corporate entities; Accounting mechanics for the issue of equity and preference shares at Par and Premium; Strict compliance with Section 52 of the Companies Act, 2013 regarding the statutory utilization of the Securities Premium Account; Pro-rata allotment mechanics, handling of calls-in-arrears and calls-in-advance.

Forfeiture & Capital Optimization: Accounting for the Forfeiture of shares and the Re-issue of forfeited shares under varied conditions; Deletion of discount issuances as per Section 53.

Debentures & Capital Reserve Allocations: Issue of Debentures — Accounting entries for the issue of debentures with explicit conditions of redemption (at par, premium); Underwriting of Shares and Debentures: Statutory provisions, determining underwriters' absolute and contingent liabilities (Gross, Net, and Marked applications); Bonus Shares: Meaning, Purpose, SEBI Guidelines for bonus issues, sources of capitalization, and accounting entry design *(Theory and Numericals)*.

UNIT - IV: COMPANY FINAL ACCOUNTS & PRE-INCORPORATION RESTRUCTURING:

Company Final Accounts Framework: Structure and statutory mandates of the **Companies Act, 2013**; Thorough analysis and application of **Schedule III (Division I)**; General instructions, formats, and structural protocols for the presentation of the Corporate Balance Sheet (Part-I) and the Statement of Profit and Loss (Part-II).

Corporate Financial Reporting: Preparation of standard corporate Final Accounts including comprehensive modern adjustments (Current Corporate Tax provisions, Transfer to statutory Reserves, Managerial Remuneration adjustments, and Dividend Distribution constraints).

Profits Prior to Incorporation: Conceptual understanding of pre-incorporation and post-incorporation trading horizons; Principles governing the allocation of income and expenses between pre- and post-incorporation phases using Time Basis, Turnover Basis, and Specific Weighted Allocation methods; Accounting treatment and balance sheet presentation of pre-incorporation profits/losses *(Theory and Numericals)*.

UNIT - V: VALUATION OF GOODWILL AND SHARES:

Valuation of Goodwill: Meaning, features, and corporate/regulatory circumstances necessitating the valuation of goodwill; Comprehensive methods of calculation: Average Profits Method (Simple and Weighted), Super Profits Method, and Capitalization Methods (Capitalization of Average Profits vs. Capitalization of Super Profits).

Valuation of Shares: Fundamental corporate needs for share pricing and asset valuation; Analytical methods of share valuation: Net Assets Method (Intrinsic Value factoring revalued assets), Yield Basis Method (Earning Capacity and Dividend Yield), and Fair Value Method; Interpreting valuation discrepancies between asset-backed and earning-backed assessment models *(Theory and Numericals)*.

SUGGESTED READINGS:

1. Principles and Practice of Accounting: R.L. Gupta & V.K. Gupta,Sultan Chand & Sons.
2. Advanced Accounting: S.P. Jain & Narang, Kalyani Publishers, Reprinted 2025.
3. Advanced Accountancy: R.L.Gupta&Radhaswamy, Sultan Chand & Sons.
4. Advanced Accounting: Prof. Kamatam Srinivas, S Publishers, .
5. Advanced Accountancy (Vol-II): S.N.Maheshwari&V.L.Maheswari, Vikas.
6. Advanced Accountancy: Dr. G. Yogeshwaran, Julia Allen - PBP
7. Accountancy–III: Tulasian, Tata McGraw Hill Co.
8. Advanced Accountancy: Arulanandam; Himalaya.
9. Advanced Accountancy–II: S.P. Jain & K.L Narang, Kalyani Publishers.
10. Advanced Accounting: Sumera Anwar, B. Sunitha, Y.Venkat Reddy SV Publications, First Edition.
11. Guidance Note on the Revised Schedule VI to the Companies Act, 1956, The Institute of Chartered Accounts of India.
12. Advanced Accounting (IPCC): D. G. Sharma, Tax Mann Publications.
13. Advanced Accountancy: BM Agarwal and MP Gupta, Sultan Chand and Son's Volume -1&2, New Delhi

SEMESTER - III

Paper MJR 302: BUSINESS STATISTICS -I

PAPER CODE: MJR 302 **Max. Marks: 80U +20I=100**
THPW: 5; Credits: 5 **ESED: 3 hrs**

Course Objectives

1. To introduce the fundamental concepts, scope, importance, and limitations of statistics in business and economic decision-making.
2. To develop students' ability to collect, classify, tabulate, and present data using appropriate statistical tools and graphical techniques.
3. To impart knowledge and computational skills related to measures of central tendency for different types of data series.
4. To enable students to measure and analyze dispersion, variability, and the shape of distribution using statistical methods.
5. To familiarize students with the concept, construction, and applications of index numbers in economic and business analysis.

Course Outcomes

CO1: Understand and explain the fundamental concepts of statistics, including data collection methods, classification, tabulation, and presentation techniques.
CO2: Present and interpret data using diagrams, graphs, and frequency distributions for meaningful analysis.
CO3: Compute and interpret various measures of central tendency such as mean, median, mode, and other averages for different data series.
CO4: Analyze data using measures of dispersion, coefficient of variation, skewness, and kurtosis to understand variability and distribution patterns.
CO5: Construct and evaluate index numbers using different methods and apply them in business and economic decision-making.

UNIT I: INTRODUCTION, DATA ORGANIZATION AND PRESENTATION:

Meaning and scope of statistics. Importance and limitations of statistics in business and commerce; Statistical investigation: Planning of a statistical enquiry. Sources of data – primary and secondary data. Methods of collecting data. Census and sampling methods. Errors in statistical investigation and approximation; Organization of data: Classification and tabulation of data. Frequency distribution and grouped frequency tables; Diagrammatic and graphical presentation of data: Bar diagrams, component bar diagrams, pie diagrams and line graphs. Histograms, frequency polygon and frequency curve. Interpretation of statistical diagrams and graphs.

UNIT II: MEASURES OF CENTRAL TENDENCY:

Definition and types of data: Individual series, discrete series and continuous series; Meaning and importance of measures of central tendency; Arithmetic Mean – computation for individual, discrete and continuous series. Combined mean, Weighted Mean; Geometric Mean and Harmonic Mean – meaning, computation and applications.
Partition values – Median, Quartiles, Deciles and Percentiles, and Mode – calculation for different series and graphical location; Comparison of averages – advantages and limitations of different measures of central tendency.

UNIT III: MEASURES OF DISPERSION:

Meaning and significance of dispersion. Characteristics of a good measure of dispersion. Absolute and relative measures of dispersion. Measurement of dispersion through Range, Quartile Deviation, Mean Deviation and Standard Deviation – computation and applications for individual, discrete and continuous series; Relative measures of dispersion – Coefficient of Range, Coefficient of Quartile Deviation and Coefficient of Mean Deviation. Combined Standard Deviation – computation and applications; Applications of dispersion in business and economic analysis. Advantages and limitations of various measures of dispersion.

UNIT IV: RELATIVE DISPERSION AND SHAPE OF DISTRIBUTION:

Coefficient of Variation: Meaning and significance, Relative measure of dispersion, Computation and interpretation, Comparison of consistency and stability of two or more series; Lorenz Curve: Meaning and significance, Construction of Lorenz Curve, Measurement of inequality and concentration, Applications in income, wealth and market-share analysis; Skewness: Meaning and significance, Symmetrical and asymmetrical distributions, Positive and negative skewness, Karl Pearson's Coefficient of Skewness, Bowley's Coefficient of Skewness, Interpretation and applications; Kurtosis: Meaning and significance, Types of kurtosis, Interpretation of kurtosis in statistical analysis.

UNIT V: INDEX NUMBERS:

Meaning and importance of index numbers in economic and business analysis. Uses and limitations of index numbers; Problems in the construction of index numbers; Methods of constructing index numbers: Simple index numbers and weighted index numbers – Laspeyres', Paasche's and Marshall–Edgeworth methods; Tests of adequacy of index numbers – Unit test, Time Reversal test and Factor Reversal test, Base shifting, splicing and deflating of index numbers.

SUGGESTED READINGS:

1. Statistics for Management: Levin & Rubin, Pearson
2. Fundamentals of Statistics: Gupta S.C, Himalaya
3. Business Statistics: Arun Kumar Singh, Kalyaniu Publishers, First Edition 2017
4. Business Statistics: S. L Aggarwal, S. L. Bhardwaj, Kalyani Publications
5. Statistics: E. Narayanan Nadar, PHI Learning
6. Business Statistics-I: Dr. Padmaja, K.Kamakshi SV Publications, First Edition
7. Business Statstics –I: Dr. Obul Reddy, Dr. D. Shridevi - PBP
8. Business Statistics: Dr. J. K. Thukral, Taxmann Publications
9. Business Statistics –I: Dr. Prashanta Athma, N. Rajyalaxmi – SIA Publishers & Distributors Pvt. Ltd.
10. Business Statistics: K. Alagar, Tata McGraw Hill
11. Fundamentals of Statistical: S. P Gupta, Sultan Chand
12. Business Statistics: J. K. Sharma, Vikas Publishers
13. Business Statistics- 1: Dr. Nazia Sultana, S Publishers
14. Statistics-Problems and Solutions: Kapoor V.K, S. Chand
15. Statistics - Theory, Methods and Applications: Sancheti D.C. & Kapoor V.K
16. Business Statistics: S. K. Chakravarty, New Age International Publishers
17. Statistics: Andasn,Sweenly,Williams,Cingage.

SEMESTER - III

Paper MJR 303: RELATIONAL DATABASE MANAGEMENT SYSTEM

Hours Per Week: (3T+4P) **Credits**: 5

Exam Hours: 3 **Marks:** 50U+35P+15I=100

Course Objectives

1. To provide a strong foundation in database concepts, architecture, and data models.
2. To develop skills in relational database design using normalization and integrity constraints.
3. To enable students to use SQL for database creation, manipulation, and querying.
4. To introduce transaction management, concurrency control, recovery, and security concepts.
5. To familiarize students with modern database systems including distributed and NoSQL databases.

Course Outcomes

CO1: Explain DBMS concepts, architecture, and data models including relational and ER models.

CO2: Apply normalization techniques and integrity constraints to design efficient databases.

CO3: Use SQL effectively for data definition, manipulation, and querying.

CO4: Analyze transaction management, concurrency control, recovery, and security mechanisms.

CO5: Evaluate distributed, client-server, and modern database systems for real-world applications.

UNIT-I: BASIC CONCEPTS:

Database Management System - File based system - Advantages of DBMS over file based system -Database Approach - Logical DBMS Architecture - Three level architecture of DBMS or logical DBMS architecture - Need for three level architecture - Physical DBMS Architecture - Database Administrator (DBA) Functions & Role - Data files indices and Data Dictionary - Types of Database. Relational and ER Models: Data Models - Relational Model – Domains - Tuple and Relation - Super keys - Candidate keys - Primary keys and foreign key for the Relations – Relational Constraints - Domain Constraint - Key Constraint - Integrity Constraint - Update Operations and Dealing with Constraint Violations - Relational Operations - Entity Relationship (ER) Model – Entities – Attributes – Relationships - More about Entities and Relationships - Defining Relationship for College Database - E-R Diagram - Conversion of E-R Diagram to Relational Database.

UNIT-II: DATABASE INTEGRITY AND NORMALISATION:

Relational Database Integrity - The Keys - Referential Integrity - Entity Integrity - Redundancy and Associated Problems – Single Valued Dependencies – Normalisation - Rules of Data Normalisation – The First Normal Form -The Second Normal Form - The Third Normal Form - Boyce Codd Normal Form - Attribute Preservation - Lossless-join Decomposition - Dependency Preservation. File Organisation: Physical Database Design Issues - Storage of Database on Hard Disks - File Organisation and Its Types - Heap files (Unordered files) - Sequential File Organisation - Indexed (Indexed Sequential) File Organisation - Hashed File Organisation - Types of Indexes - Index and Tree Structure - Multi-key File Organisation - Need for Multiple Access Paths - Multi-list File Organisation - Inverted File Organisation.

UNIT-III: STRUCTURES QUERY LANGUAGE (SQL):

Meaning – SQL commands - Data Definition Language - Data Manipulation Language - Data Control Language - Transaction Control Language - Queries using Order by – Where - Group by – Nested Queries. Joins – Views – Sequences - Indexes and Synonyms - Table Handling.

UNIT-IV: TRANSACTIONS AND CONCURRENCY MANAGEMENT:

Transactions - Concurrent Transactions - Locking Protocol - Serialisable Schedules - Locks Two Phase Locking (2PL) - Deadlock and its Prevention - Optimistic Concurrency Control. Database Recovery and Security: Database Recovery meaning - Kinds of failures - Failure controlling methods - Database errors - Backup & Recovery Techniques - Security & Integrity - Database Security - Authorization.

UNIT-V: DISTRIBUTED AND CLIENT SERVER DATABASES:

Need for Distributed Database Systems - Structure of Distributed Database - Advantages and Disadvantages of DDBMS - Advantages of Data Distribution - Disadvantages of Data Distribution – Data Replication - Data Fragmentation. Client Server Databases: Emergence of Client Server Architecture - Need for Client Server Computing - Structure of Client Server Systems & its advantages. ADVANCED TOPICS: Overview: Parallel Database - Multimedia Database - Mobile Database - Web
Database - Multidimensional Database. Data Warehouse - OLTP Vs OLAP - NoSQL Database.

LAB WORK

1. Creating tables with constraints using SQL
2. Data insertion, updating, and deletion
3. Writing queries using WHERE, GROUP BY, HAVING
4. Implementing joins and subqueries
5. Creating views and indexes
6. Simple transaction control commands
7. Mini project: Database design + SQL implementation

SUGGESTED READINGS:

1. Database Systems: R.Elmasri& S.B.Navathe, Pearson.
2. Introduction to Database Management System: ISRD Group, McGraw Hill.
3. Relational Database Management System: K. Prashanth Kumar: Kalyani Publishers, Year of Publication: 2017, Reprinted 2024.
4. Relational Database Management: Ms Sunanda Gutti, S Publishers
5. Database Management System: R.Ramakrishnan&J.Gehrke, McGraw Hill.
6. Modern Database Management: J.A.Hoffer,V.Rames&H.Topi, Pearson.
7. Database System Concepts: Silberschatz, Korth & Sudarshan,McGraw Hill.
8. Simplified Approach to DBMS: Parteek BhaiaKalyani Publishers.
9. Database Management System: Nirupma Pathak, Himalaya.
10. Database Management Systems: Pannerselvam, PHI.
11. Relational Database Management System: Srivastava &Srivastava, New Age
12. PHPMySQL SpokenTutorials byIIT Bombay.
13. Oracle Database: A Beginner's Guide: I.Abramson, McGraw Hill.
14. Relational Database Management System: G. Kavitha Reddy, Dr. P. Nageshwar, SV Publications, Second Edition

SEMESTER - IV

Paper MJR401: CORPORATE ACCOUNTING

PAPER CODE: MJR 401 **Max. Marks: 80U +20I=100**
THPW: 5; Credits: 5 **ESED: 3 hrs**

Course Objectives:
1. Understand corporate insolvency, liquidation procedures, and IBC, 2016 framework
2. Apply accounting standards for amalgamation, absorption, and external reconstruction as per AS-14
3. Examine internal reconstruction schemes and accounting for business acquisitions
4. Prepare financial statements of banking companies per Banking Regulation Act, 1949
5. Understand insurance accounting and compute claims for loss of stock and loss of profit

Course Outcomes:
1. Prepare Statement of Affairs, Deficiency Account, and Liquidator's Final Statement of Account with order of payment
2. Compute purchase consideration and pass journal entries for amalgamation under Pooling of Interest and Purchase methods
3. Account for capital reduction and prepare post-reconstruction balance sheets under Section 66 of Companies Act, 2013
4. Prepare Form A and Form B for banking companies, including treatment of NPA, income recognition, and rebate on bills discounted
5. Prepare Revenue Account and Balance Sheet for life and general insurance, and compute insurance claims with Average Clause

UNIT-I: CORPORATE INSOLVENCY & LIQUIDATION:

Regulatory Framework: The Insolvency and Bankruptcy Code (IBC), 2016 (brief overview); Modes of Winding Up.
Liquidator's Mechanics: Statement of Affairs, Deficiency/Surplus Account; Classification of Creditors (Secured, Preferential, Unsecured); Order of Payment.
Accounting Treatment: Liquidator's Remuneration; Preparation of Liquidator's Final Statement of Account; Distribution of surplus to contributories *(Theory and Numericals)*.

UNIT-II: AMALGAMATION, ABSORPTION & EXTERNAL RECONSTRUCTION (AS-14):

Conceptual Framework: Distinguishing between Amalgamation in the nature of Merger and Amalgamation in the nature of Purchase (AS-14).
Purchase Consideration: Advanced methods of calculating consideration (Lump Sum, Net Assets, and Net Payment methods).
Accounting Treatment: Pooling of Interest Method vs. Purchase Method; Journal entries in the books of the Transferor Company (closing entries) and Transferee Company (incorporation entries); Treatment of inter-company holdings, unrealized profits, and debenture conversion *(Theory and Numericals)*.

UNIT-III: INTERNAL RECONSTRUCTION & CORPORATE ACQUISITION:

Internal Reconstruction: Statutory provisions (Section 66 of the Companies Act, 2013); Accounting for Capital Reduction (Reduction of Share Capital, Alteration of Share Capital); Preparation of Reconstruction Schemes and post-reconstruction Balance Sheets.
Acquisition of Business: Business combinations; Accounting when new books are opened versus when original books are continued; Accounting for debtors/creditors taken over; Vendor's account adjustments and goodwill/capital reserve computation *(Theory and Numericals)*.

UNIT-IV: FINANCIAL REPORTING OF BANKING COMPANIES:

Regulatory Environment: Banking Regulation Act, 1949; Classification of Advances: Performing vs. Non-Performing Assets (NPA) and Income Recognition norms.
Accounting Mechanics: Slip system of posting; Rebate on Bills Discounted (accounting and provision); Preparation of Final Accounts in the prescribed
Form A and Form B (Profit & Loss Account and Balance Sheet); Asset Classification and Provisioning requirements *(Theory and Numericals)*.

UNIT-V: INSURANCE ACCOUNTING & CLAIMS:

Life Insurance: Meaning, regulatory compliance (IRDAI); Preparation of Revenue Account, Net Revenue Account, and Balance Sheet; Valuation Balance Sheet; Determination of Net Surplus and its distribution.
General Insurance: Fire and Marine insurance accounting; Preparation of Revenue accounts for various sub-segments.
Insurance Claims: Computation of claims for Loss of Stock (including Average Clause and abnormal items) and Loss of Profit (Consequential Loss policies) *(Theory and Numericals)*.

SUGGESTED READINGS:

1. Advanced Accountancy (Vol-II): S.N.Maheshwari&V.L.Maheswari, Vikas.
2. Accountancy–III: Tulasian, Tata McGraw Hill Co.
3. Corporate Accounting: S.P. Jain & Narang: Kalyani Publishers, Second Revised Edition, Year of Publication: 2018.
4. Advanced Accountancy: Arulanandam; Himalaya
5. Advanced Accountancy–II: S.P. Jain & K.L Narang, Kalyani Publishers
6. Advanced Accounting (Vol-II): Chandra Bose, PHI
7. Advanced Accountancy: Shukla and Grewal, S.Chand& Co
8. Advanced Accountancy: R.L.Gupta&Radhaswamy, Sultan Chand & Sons
9. Corporate Accounting: Sakshi Vasudeva, Himalaya.
10. **Corporate Accounting:** K. Phani Chakravarthy, Y.Venkat Reddy, SV Publications First Edition

SEMESTER - IV

Paper MJR 402: BUSINESS STATISTICS - II

PAPER CODE: MJR 402 **Max. Marks: 80U +20I=100**
THPW: 5; Credits: 5 **ESED: 3 hrs**

Course Objectives

1. To develop an understanding of correlation analysis and its applications in studying relationships among business and economic variables.
2. To impart knowledge of regression analysis for estimating relationships and making predictions and forecasts.
3. To enable students to analyze time series data and measure trend and seasonal variations for business decision-making.
4. To introduce the fundamental concepts and laws of probability and their applications in decision-making under uncertainty.
5. To provide knowledge of important probability distributions and their applications in business, economics, and statistical analysis.

Course Outcomes

CO1: Analyze and interpret the relationship between variables using different methods of correlation and measures associated with correlation analysis.

CO2: Apply regression techniques to estimate relationships among variables and make predictions for business and economic decision-making.

CO3: Examine time series data by identifying and measuring trend and seasonal variations using appropriate statistical methods.

CO4: Apply the concepts and laws of probability, including conditional probability and Bayes' theorem, to solve problems involving uncertainty and risk.

CO5: Compute and interpret probabilities using Binomial, Poisson, and Normal distributions and apply them to real-life business and economic situations.

UNIT I: CORRELATION:

Meaning and types of correlation – positive, negative, simple, multiple, partial, linear and non-linear correlation. Correlation and causation. Methods of studying correlation: Scatter diagram, Concurrent Deviation Method, Karl Pearson's coefficient of correlation and Spearman's rank correlation coefficient. Covariance and its relationshipwithCorrelation. Standard error and probable error of the coefficient of correlation. Coefficient of determination, coefficient of non-determination and coefficient of alienation. Interpretation, applications and limitations of correlation in business and economic analysis.

UNIT II: REGRESSION ANALYSIS:

Meaning and significance of regression analysis. Difference between correlation and regression. Types of regression – linear and non-linear regression. Lines of regression – regression line of Y on X and regression line of X on Y; Regression equations and regression coefficients – derivation of regression equations, estimation of regression coefficients, properties of regressioncoefficients, and relationship between correlation coefficient and regression coefficients.Standard Error of Estimate – meaning, computation and interpretation. Prediction and forecasting using regression equations. Applications of regression analysis in business and economic decision-making. Limitations of regression analysis.

UNIT III: TIME SERIES ANALYSIS:

Meaning and importance of time series in business and economic analysis. Components of time series – Trend, Seasonal, Cyclical and Irregular Variations; Measurement of Trend:Graphic Method, Semi-Averages Method (for even and odd number of years/periods), Moving Averages Method (3-year, 4-year, 5-year and 7-year moving averages; centering of moving averages where necessary); Least Squares Method (Linear Trend); Measurement of Seasonal Variations:Simple Averages Method, Ratio-to-Moving Average Method, Link Relative Method, Applications, Uses and Limitations of Time Series Analysis in business and economic studies.

UNIT IV: PROBABILITY THEORY:

Meaning and importance of probability. Random experiments, sample space and events. Types of events – simple and compound events, mutually exclusive events, collectively exhaustive events and independent events. Basic concepts of set theory relevant to probability. Approaches to probability – classical, empirical and subjective approaches; Laws of probability – Addition Theorem and Multiplication Theorem. Conditional probability and Bayes' Theorem. Applications of probability in business and decision-making.

UNIT V: PROBABILITY DISTRIBUTIONS:

Binomial Distribution:Assumptions and characteristics, Properties of Binomial Distribution, Computation of probabilities, Fitting of Binomial Distribution; Poisson Distribution: Assumptions and characteristics, Properties of Poisson Distribution, Computation of probabilities, Fitting of Poisson Distribution; Normal Distribution: Characteristics and properties of Normal Distribution, Standard Normal Distribution, Computation of probabilities using Normal Distribution tables, Applications of Normal Distribution in business and economics, Central Limit Theorem – concept and significance.

SUGGESTED READINGS:

1. Statistics for Management: Levin & Rubin, Pearson,
2. Fundamentals of Statistics: Gupta S.C, Himalaya
3. Business Statistics II: Arun Kumar Singla, Kalyani Publishers, Year of Publication: 2018, Reprinted 2025.
4. Business Statistics: Theory & Application, P. N. Jani, PHI Learning
5. Business Statistics II: S. L Aggarwal, Kalyani Publications
6. Business Statics – II: Dr. OBul Reddy, Dr. D. Shridevi - PBP
7. Business Statistics: Dr. J. K. Thukral, Taxmann Publications
8. Business Statistics –II: Dr. Prashanta Athma, N. Rajyalaxmi – SIA Publishers & Distributors Pvt. Ltd.
9. Business Statistics: K. Alagar, Tata Mc Graw Hill
10. Fundamentals of Statistical: S. P Gupta , Sultan Chand
11. Business Statistics: J. K. Sharma,Vikas Publishers
12. Business Statistics: Vora, Tata Mc Graw Hill
13. Statistics-Problems and Solutions: Kapoor V.K, S. Chand
14. Statistics-Teory, Methods and Applications: SanchetiD.C. & Kapoor V.K
15. Business Statistics: S. K. Chakravarty, New Age International Publishers
16. Business Statistics-G.Laxman,Vasudeva Reddy, K.Goud, TaxmannPublications,Hyderabad.
17. Business Statistics-II: Dr. Nazia Sultana, S Publishers
18. **Business Statistics-II:** S. Bhagya Laxmi, Gampala Sudhakar SV Publications, First Edition

SEMESTER - IV

Paper MJR 403: WEB TECHNOLOGIES

Hours Per Week:(3T+4P) **Credits**: 5
Exam Hours:3 **Marks:** 50U+35P+15I=100

Course Objectives

1. To introduce the fundamentals of web technologies and HTML for web page creation.
2. To develop skills in designing responsive web pages using CSS.
3. To enable students to create dynamic web pages using JavaScript and DOM manipulation.
4. To provide knowledge of server-side scripting using PHP and database connectivity.
5. To familiarize students with modern web concepts and basic enterprise technologies.

Course Outcomes

CO1: Design structured web pages using HTML5 and apply web design principles.
CO2: Develop visually appealing and responsive web pages using CSS.
CO3: Implement dynamic functionality using JavaScript and event handling.
CO4: Build interactive web applications using PHP and connect them with databases.
CO5: Understand advanced web technologies and develop complete web-based solutions.

UNIT – I: INTRODUCTION TO WEB TECHNOLOGIES & HTML

Introduction to web technologies – Internet and World Wide Web – Structure of a website – HTML5 basics – Basic structure of HTML – Text formatting – Hyperlinks – Images – Lists – Tables – Forms and form elements – Attributes – Comments – Web design principles – Introduction to semantic elements (header, footer, section).

UNIT – II: CASCADING STYLE SHEETS (CSS)

Introduction to CSS – Types of CSS (Inline, Internal, External) – CSS syntax and selectors – Text and font styling – Colors and backgrounds – Box model – Margins, padding and borders – Layout techniques – Basic responsive design concepts – Positioning and alignment – Introduction to simple transitions and effects.

UNIT – III: JAVASCRIPT AND DOM MANIPULATION

Introduction to JavaScript – Client-side scripting – Variables, data types, operators – Control structures – Functions – Arrays and objects – Document Object Model (DOM) – Event handling – Form validation – Manipulating HTML and CSS dynamically – Basic debugging techniques.

UNIT – IV: SERVER-SIDE SCRIPTING USING PHP

Introduction to PHP – Syntax and basic constructs – Variables, data types, operators – Control structures and functions – Handling forms using PHP – File handling – Sessions and cookies – Introduction to MySQL – Database connectivity using PHP – Executing queries and handling results – Building simple dynamic web applications.

UNIT – V: XML AND INTRODUCTION TO ENTERPRISE WEB TECHNOLOGIES

Introduction to XML – Structure and syntax – Creating XML documents – XML with CSS/XSL – Basic XML parsing concepts – Introduction to JSP – Structure of JSP page – Directives, expressions and implicit objects – Session tracking – Basic database connectivity – Overview of modern web technologies and frameworks.

LAB WORK

1. Create basic web pages using HTML5 elements.
2. Design web pages using CSS (layouts, styling, responsiveness).
3. Implement JavaScript programs for validation and DOM manipulation.
4. Develop dynamic forms using PHP.
5. Create database-driven applications using PHP & MySQL.
6. Build a mini project: Dynamic website with frontend and backend integration.
